

1. Explain uses of ping command in network ?

Ping command ~~can~~ koodutha 50.20 ping koodutha
oru dummy data generate agum athu A-B poithe
thumba B-A Vanthum. Reply varum 4 reply param

2. Explain netbios protocol ?

Netbios Network basic input/output system oru
computer one by one ah identify param communicate
pannam. use panna padava protocol.

3. Explain SMB protocol ?

SMB (Server Message Block) or network
protocol ~~that~~ idha use pani oru computer
la isukkura files, folders, printers vera
computer access pannalam.

4. Explain ping process from 50.0.0.10 to 50.0.0.20 ?

Ping 50.0.0.20 Two pc physical connection apam ip address
koppa panitu ping command kooduthu back end the
oru process aguthum find para param OSI model
Open system interconnection OSI model 7 layers there are
physical, data link, network, transport, session, presentation
Application ping cmd koodum pothu dummy data
one generate agum the name echo. 32 bytes
athu koodu oru protocol orukum icmp

Internet control message protocol next presentation layer k encapsulation
nadatum. Format, Session, Time, Network, IP address
Source IP, destination IP. IP, Internet protocol ita ena oru
na packet next Data link. Smac, Dmac ~~ethernet~~ Ethernet, ARP Request.
